

Hunters Point Naval Shipyard

Parcel F
Radiological Data Gap Investigation
(RAD DGI), Phase 2b
BCT Meeting
February 28, 2013

Parcel F Overview

HPNS Parcel F RAD DGI

- Completed offshore sediment coring at 141 locations along entire length of Parcel F.
 - Based on re-analyses of 8 Phase 1 cores (all below PALs), resampling at those locations (including associated step-outs) were not needed.
- Clam (*Macoma nasuta*) recovery at 5 locations within Parcel F and 2 reference locations in the Bay (Oyster Point and Paradise Cove) were completed.
- Sedflume samples were collected on February 11, 2013. Sediment samples were submitted for radiological analyses prior to offsite release. Sedflume evaluation is pending receipt of radiological results.
